Introduction

The aim of this project is to develop a website that serves as a comprehensive platform for users to discover artisans in various industrial fields and the ease of booking an appointment with the technician with a profile specific to each technician and community to showcase their occupation and an assessment of the technician through the customer with the availability of the tools store they can buy the tools through.

Steps

Week 1

: Initial Database Design and Migration

Week 2

Model Implementation and Role-Based Access Control

Week 3

Completing Models and Building Real-Time Chat.

Week 4

building dashboard and final test.

[Back to Agenda Page](#)

Purpose

The platform aims to provide users with an easy and efficient way to discover artisans and technicians across various industrial fields. Users will be able to book appointments, view profiles of technicians (including their skills, past work, and client reviews), and purchase necessary tools and equipment from an integrated online store. Additionally, the platform will serve as a community hub where artisans can showcase their expertise and connect with potential clients.

Web Header

This header contains a navigation bar with the following menu items: "HOME," "ABOUT," "WORKER," "TOOLS," and "CONTACT." On the right side, there are three icons representing a shopping cart, an envelope (likely for messages or email), and a user account dropdown. The logo at the top left says "Snai3i"
